Luxurious spaces can include environmentally friendly features. Emily Mackie Norris and Inspired Interiors incorporate 'green' features into your space while maintaining a gorgeous and elegant interior. Few designers can create spaces that are stunning while comfortable, unique while within your budget and 'green' while decadent. It's only a masterpiece if it represents your authentic personality and lifestyle. Dare to know perfection.

1. By blending English architectural details into a space for a young family of four, Inspired Interiors provided an inviting environment for cooking and entertaining. A custom-designed hood, vintage hardware, reclaimed lighting and recycled marble countertops balance the warmth of the English countryside with this modern Chicago home.
2. Both custom-designed by Emily Mackie Norris, the rich texture of a coconut palm breakfast table and the delicate lighting of an Italian chandelier were crafted with this client's style in mind. The subtle incorporation of a dark alder desk area provides a much-needed space for the family's active lifestyle.
